WHAT WE ARE ASKING FOR

A quotation, not a partnership yet

Self-Made Legends is a luxury streetwear house in Missouri. Our apparel is in production and selling. We are now placing our first footwear run and are approaching a short list of factories.

We are asking you to price two products. We are not asking you to develop a new silhouette, and we are not asking you to absorb tooling. Both of those come later, and only if the first run sells.

OUR TOOLING POSITION

Your lasts and outsoles. Our upper.

We understand that a steel mould runs from roughly \$1,500 to \$5,000 **per size**, and that a fully bespoke silhouette across a size run means \$20,000 or more in tooling before a single pair exists. That is not this order.

For this run we want to build on tooling you already own — your existing lasts, midsoles and outsoles. Everything our customer actually sees is ours: material, colourway, embroidery, embossing, badges, footbed print, lining, packaging. If that lets you quote at 100 to 300 pairs per style rather than 1,000, it is the right trade for both of us.

Please tell us what your standard tooling can already do before you quote anything custom. We would rather change our design to fit a mould you own than pay to cut a new one.

QUANTITIES WE WANT PRICED

Tier	Pairs per style	Why we are asking
Test	100	First run. We expect a higher per-pair price here and accept it.
Launch	300	Our target if the numbers work.
Repeat	500	So we can see where your price breaks.

Please quote all three tiers. Seeing the curve tells us more than any single number.

Empire Slide and Legacy Flip Flop

One moulded family, four colourways each. This is the product we most want priced, because it needs no last development and the decoration is all surface work.

Golden Throne — Legacy Flip Flop and Empire Slide, four colourways each

Construction	Moulded rubber / EVA. Your existing sole family.
Sizes	US 7–13 men's. Tell us your standard run.
Colourways	Royal Black Gold · Emerald Green Gold · Legacy Purple Gold · Ivory Gold. Quote for four, and tell us the minimum per colourway.
Upper	Slide: single strap, gold crest, gold piping to both edges. Flip flop: toe post with a shield badge at the strap junction.
Footbed	Embossed monogram texture across the bed, plus the line “Lead the legacy. Leave a mark.” Debossed, not printed.
Outsole	Our mark and a run number in the existing tread pattern if your tooling allows an insert. If it does not, say so — we will drop it rather than cut a mould.
Hardware	Embossed metal badge at the strap. Quote with and without: we want to see what the metal part costs us.

Packaging

Rigid black box, gold foil crest. Quote separately, or tell us your standard.

PRODUCT TWO

Golden Throne — Signature Edition

A low trainer. Chosen from our range because it is the one whose character sits almost entirely in the upper. We have deliberately not asked you to price the models that need a sculpted heel.

Golden Throne — Signature Edition

Construction	Cupsule or vulcanised, whichever you already tool. We are not specifying it.
Sizes	US 7–13 men's.
Upper	Full-grain or premium synthetic leather, black. Metallic gold overlays at the swoop panel, eyestay and heel tab.
Decoration	Embroidered or heat-applied crest at the quarter. Gold foil wordmark at the lateral panel. Script at the heel counter. All surface work.
Wing panel	The emerald and purple wing on the medial side is a printed or embroidered panel, not a moulded part. Please price it both ways.
Midsole	Your standard unit. A visible air or gel window is wanted but not required — tell us whether you have one already tooled, and quote without it if not.
Insole	Printed crest and the line “Not given. Earned.”
Lining	Tongue lining carries a printed message. Standard textile.

What comes after, if the first run sells

These models need real tooling: a sculpted lion-head heel counter, a bull-horn heel, custom air chambers. We know what that costs and we are not asking you to price it today. We are showing you because we would rather build a long relationship with one factory than shop each style around.

Lion King GX and Toro Bravo — sculpted heel counters. Tooling required.

If you have an existing heel-counter mould that could carry a raised emblem, we would be glad to hear about it. Adapting your tool beats cutting ours.

WHAT WE NEED BACK

Five answers, and a price

1. What is your MOQ on tooling you already own — per style, and per colourway?

This decides whether we can work together at all.

2. What does a sample cost, how long does it take, and is it credited against the first order?

We will pay for samples. We will not order production off a photograph.

3. Looking at our designs, what is moulded and what is upper-only?

You know your tooling. Tell us what to change to stay off a new mould.

4. What are your payment terms, and what is inspected before the balance is due?

We are a small company placing a first order. This answer matters more than your price.

5. What is the lead time from approved sample to goods delivered to Missouri?

Including shipping and customs, not ex-works.

PRICE, PER PAIR, FOB OR DELIVERED — PLEASE STATE WHICH

Style	100 pairs	300 pairs	500 pairs	Sample
Empire Slide				
Legacy Flip Flop				
Signature Edition
